

Person

<u>Ssn</u>	age	gender	firstName	lastName	GId
------------	-----	--------	-----------	----------	-----

Company

<u>cName</u>	cAddress	GId
--------------	----------	-----

Guest

<u>GId</u>	guestType	<u>OrdId</u> delete it	VId	status
------------	-----------	------------------------	-----	--------

注：Guest 的 union type 的实现方式是 surrogate key.

Gym

<u>FacilityId</u>	type
-------------------	------

ChessRoom

<u>FacilityId</u>	size
-------------------	------

Facility

ServiceId (PK)

FacilityId

duration

suggestion, same with Food

<u>FacilityId</u>	<u>ServiceId</u>	<u>Session</u> duration
-------------------	------------------	-------------------------

注：Facility 的 union type 的实现方式是 inherit the same key.

Food

<u>FoodId</u>	<u>ServiceId</u>	deliveredTime
---------------	------------------	---------------

注：Specialization Food & Facility 的实现方式是 a. Multiple Relations – superclass and subclass.

Service

<u>ServiceId</u>	cost	RoomId
------------------	------	--------

注：Relationship Orders 的实现方式是 Foreign key.

Room

<u>RoomId</u>	available	price	BigFlag	DoubleFlag	SingleFlag
---------------	-----------	-------	---------	------------	------------

注：Specialization BigRoom & DoubleRoom & SingleRoom 的实现方式是 d. Single relation with multiple type attributes.

Administrator

<u>UserId</u>	password
---------------	----------

Employee

<u>UserId</u>	password
---------------	----------

注：Specialization User 的实现方式是 b. Multiple relations – subclass relations only.

Bill

<u>Gid</u>	<u>BillId</u>	ResId	EId	payDate	total
------------	---------------	-------	-----	---------	-------

注：weak entity 继承了 owner entity 的 primary key – Gid.

Pays

<u>Gid</u>	<u>BillId</u>
------------	---------------

Delete

注：Relationship pays 的实现方式是 Relationship relation.

Contact

<u>Gid</u>	<u>telNo</u>
------------	--------------

注：telNo 是 Multivalue attribute.

Reserve

<u>EmpId</u>	<u>Gid</u>	<u>RoomId</u>	ResId	startDate	endDate
--------------	------------	---------------	-------	-----------	---------

注：Reserve 是 3-ary relationship. 实现方式是 Relationship relation.
